Due to increased production we can now offer a large selection of best quality softwood timber bi-products to local farmers at summer prices.

Our most popular range includes;

Sawdust: A very versatile and economic source of livestock and equine bedding.

Wood Fibre: An ideal source of bedding for livestock or for use on cattle tracks or gallops.

Wood Chip: Ideal for landscaping and gardens.

Bark (ungraded) Ideal as ornamental ground cover for garden and parks.

Firewood: Ideal for use in wood burners, stoves and open fires. As well as being an environmentally friendly product it also provides a cost-effective source of heat.

Please contact us with your requirements on the above number.
